Identification of new studies via databases and registers

Identification of new studies via other methods

Identification

Records identified from:
Databases (n = 3,931)
Registers (n = TBD)

Records removed before screening:
Duplicate records (n = 1,133)
Records marked as ineligible by automation tools (n = 0)
Records removed for other reasons (n = 0)

Records identified from:
Websites (n = 0)
Organisations (n = 0)
Citation searching (n = TBD)

Screening

Records screened
(n = 2,798)

Records excluded
(n = TBD)

Reports sought for retrieval
(n = 55)

Reports not retrieved
(n = 2)

Reports sought for retrieval
(n = 8)

Reports not retrieved
(n = 8)

Reports assessed for eligibility
(n = 53)

Reports excluded:
No pneumonia/CAP subgroup with arm-level mortality (n = 6)
Study integrity concerns (n = 3)
Design paper without arm-level results (n = 1)
No CAP subgroup expected (OCR check pending) (n = 1)

Reports assessed for eligibility
(n = 0)

Reports excluded:
Not yet assessed (n = 0)

Included

New studies included in review
(n = 18)
Reports of new included studies
(n = 38)

DRAFT. TBD = count not yet available (see PRISMA_draft_2026-11-10.md).
Boxes from 'Reports sought' downward count reports (full-text records); the included box gives studies and their reports.
Block D (supplementary sepsis/ARDS search, 9 retained records) is counted in the database arm only.
Of the 53 reports assessed, 4 are neither included nor excluded: 4 ongoing trials without results (RECORDS, ASTEROIDS, Hong 2022, COLOSSEUM).
Other methods: 8 full texts to obtain (El-Ghamrawy 2006, Li (Gang) 2016, Zhou 2015, Wagner 1956, Soboleva 2000, Dambrava 2006, Oh 2009, Kapisyzi 2012); provenance to confirm.
